Dear Louise,

**Re: Electricity Distribution Licence Condition 31E – Distribution Flexibility Services Procurement Statement 2021 – 2022**

Last Mile Electricity Limited (LMEL) is an Independent Distribution Network Operator (IDNO) that owns electricity distribution networks throughout the UK with approximately 203,000 connected customers.

Please see the below reporting submission in relation to electricity distribution licence condition 31E (C31E) covering the period 1st April 2021 – 31st March 2022.

**We have considered our flexibility procurement for the aforementioned period in line with our licence conditions as follows:**

- The flexibility services contracted for use in the reporting year, compared with the flexibility services dispatched in the reporting year, in MW or MVA.
- If flexibility needs were not met.
- The projected flexibility services procured, compared with actual services procured, by product type.
- A summary organised first by product, and further presented by location, of the flexibility services that were tendered for in the preceding twelve months.
- A summary of any conflict mitigation that had taken place as a result of coordination with the ESO.

We are able to confirm in line with our 2021 Flexibility Procurement Statement, that we have not procured any flexibility services during this period.

Yours sincerely,

Richard Welsby  
Senior Manager, Engineering
